

HIMSS Europe CIO Summit Presented by HIMSS Analytics Europe

Geneva, Switzerland
20 – 22 November

Anders Björklind

MD, PhD, CMO

Deployment of EMR in the County Council of Uppsala, Sweden

County Council of Uppsala

- Population 320 000
- Two Hospitals
- 23 District Health Care Centers
- 11 000 employees
- Health Care 950 million €

Agenda

- Background
- One patient-one-journal
- Conditions for success
- Implementation
- Future

Background

- Paper records in hospitals
- Different EPR in public and private primary care
- Political decision regarding procurement

One-patient-one-journal

- One and the same journal in both hospitals and in primary care (both public and private) “Common Medical Journal”
- Care Documentation, Order Management, Medication, Resource Allocation, Scheduling, etc.
- Radiology, Images other than radiology, Laboratory

Patient security and integrity

- The patient have the right to say no to Common Medical Record
- The patient have the right to limit the access (Patient Controlled Access)

Prerequisite for success

- United politicians
- Dedicated leadership
- Determined project manager
- Physicians
- Planning

Implementation

- Local leadership
- Continuous information to all users (80%!!)
- Careful documentation of routines, methods and procedures
- Reduce number of work flows
- “Superusers”

Future

- Change management
- Continuous education and reeducation
- Method of documentation (Care Plan)
- Adjusting work flows
- Integration with other Care systems

Thank you!
